Device Marking

P*FF.FF* L
- ***YMDxxx***

P = Pletronics
FF.FF L = Frequency in MHz, L for LVDS (frequency is 5 characters including decimal)
YMD = Date Code, All other marking is internal codes

Note: Specifications such as frequency stability, supply voltage and operating temperature range, etc. are not identified from marking. External packaging labels and packing list will correctly identify the ordered Pletronics part number.

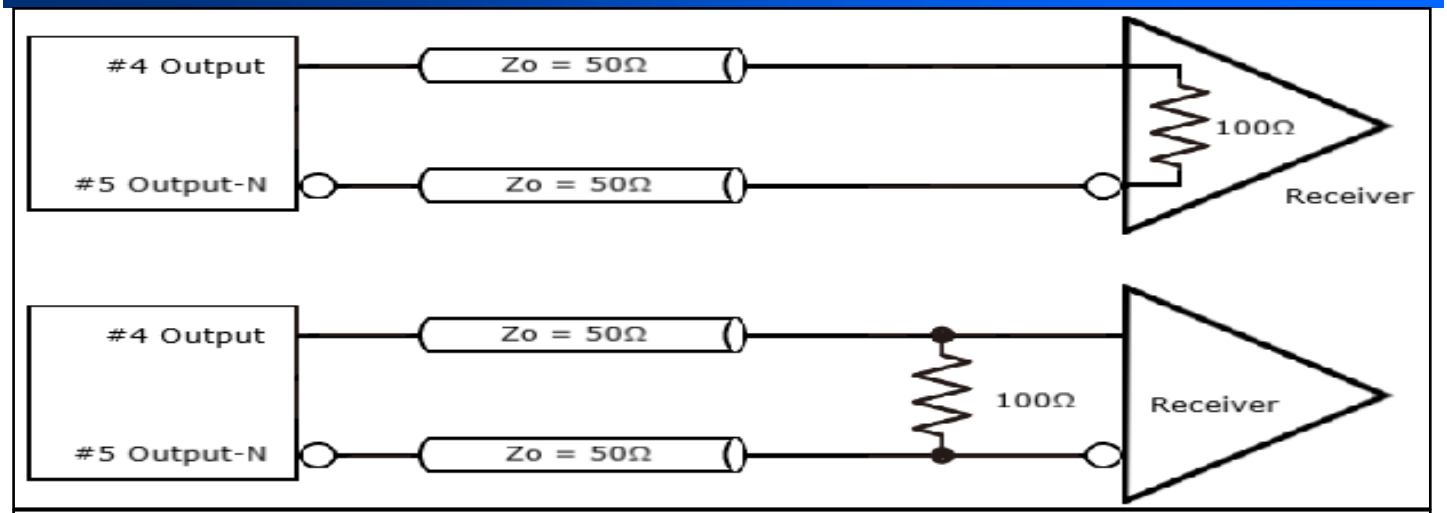
Recommended Termination



For any other terminations, the oscillator should be sampled and tested in the application. Both outputs shall be terminated and biased for proper operation.

For Optimum Jitter Performance, Pletronics recommends:

- A ground plane under the device
- Do not route large transient signals (both current and voltage) under the device
- Do not place near a large magnetic field such as a high frequency switching power supply
- Do not place near piezoelectric buzzers or mechanical fans
